

Dear Retail Customers and Consumers:

Recently there has been an increase in recalls affecting products made in China. Currently, Summer Infant manufactures products in both China and in the United States. As a manufacturer of juvenile products, we would like to take this opportunity to reaffirm our commitment to child safety. This has always been Summer Infant's top priority.

Summer Infant maintains processes and rigorous safety standards to ensure that our products meet applicable mandatory and voluntary safety standards. This includes internal testing, as well as external testing by independent third party testing facilities. With the recent increase of lead paint recalls, please be assured that all of our tests include lead in paint analysis, which is at the foundation of our compliance program.

We will continue to adhere to the industry standards. Additionally, we will monitor the current situation and learn from it; reaffirming the safeguards we already have in place and readdressing our Best Practices as necessary.

Thank you for your continued trust in Summer Infant.

Sincerely,

Jason P. Macari
President and CEO
